

Features Calendar 2020

Every edition of Fastener + Fixing Magazine includes dedicated features – focusing on key topics, products and applications across all sections of the magazine. Advertisers can tailor their campaigns to focus on these specific features and can also support their adverts with a relevant editorial article. These articles can be up to 350 words, plus 1 or 2 images, and will help maximise exposure.

Advertisers are also welcome to submit articles that are not feature relevant, as long as they still focus on new developments within the business. This can include new markets, the latest product developments, as well as new strategies or business developments (mergers, acquisitions, etc). Final inclusion of articles will be at the editor's discretion – with advertisers given priority.
